एक अटूट विश्वास...

STYLE MEETS FUNCTION IN EVERY SPLASH

BATH IN JOY

Where Perfect Ambiance Reflects Smiles Naturally

SINGLE LEVER SERIES

All single lever mixer series have specially designed italian ceramic discs to ensure high performance and smooth flow even under constant pressure. The use of extruded brass rods for all metal parts of the internal cartridge seamless working time.

Mr. VINEET MAHESHWARI
Director

(Visionary Entrepreneur in
Sanitary Solutions and Beyond)

Delving into the Core of KEC H: Revealing Our Work

KECH : Revealing our work step into the world of unparalleled sophistication with **KECH**, where every creation is meticulously crafted into embody the essence of quality. Trust in our expertise, to curate an extraordinary bathroom experience that transcends the ordinary. Meet **Mr. Vineet Maheshwari**, a luminary in the sanitary solution business, renowned for his visionary leadership and commitment to excellence. With a profound legacy of innovation, **Mr Vineet** continues to redefine industry standards, pushing the boundaries of sanitary solutions and aiming at delivering unwavering quality. At the core of **Mr. Vineet's** ethos lies a dedication to innovation, sustainability, and unwavering quality. Join us as we embark on a journey where tradition meets innovation, and where **KECH** catalyzes meaningful change, leaving an enduring mark on the industry.

TECHNOLOGY & R&D

All our products are designed and manufactured in-house thus ensuring strict quality control and maintaining the consistency of our product.

Technology that **saves** water

This is a revolutionary technology that lets your taps and shower save upto 80% of water without compromising of flow. Flow Restrictors adjust the flow in both low and high pressure conditions and offer the same voluminous flow every time.

Companies / Buildings aspiring to obtain "GREEN CO / IGBC / LEED / GRIHA / IAPMO" rating systems need to cover all aspects of environment such as energy, water, greenhouse emissions and waste handling. We play a major and an active role on the aspects of water usage management by helping you achieve at water conservation figures directly at the dispensing source of water.

Flow Restrictor

Flow rate options available : **1.4, 2.5, 4.0, 6.0, 8.0, 13 LPM**

- The unique flow regulator technology keeps the flow rates constant as per pre-chosen flow rates, independent of the line pressure. (e.g. at 6 liters/minute when washing your hands or 12 liters/minute when taking a shower). Consequently, the use of flow regulators not only saves a lot of money, but also guarantees an even water distribution.
- Due to controlled flow rates of each water dispensing device the life of the water fittings gets enhanced and risks of water leaking or hose bursting become minimal.
- Final out come is to save & reduce wastage of water from source.

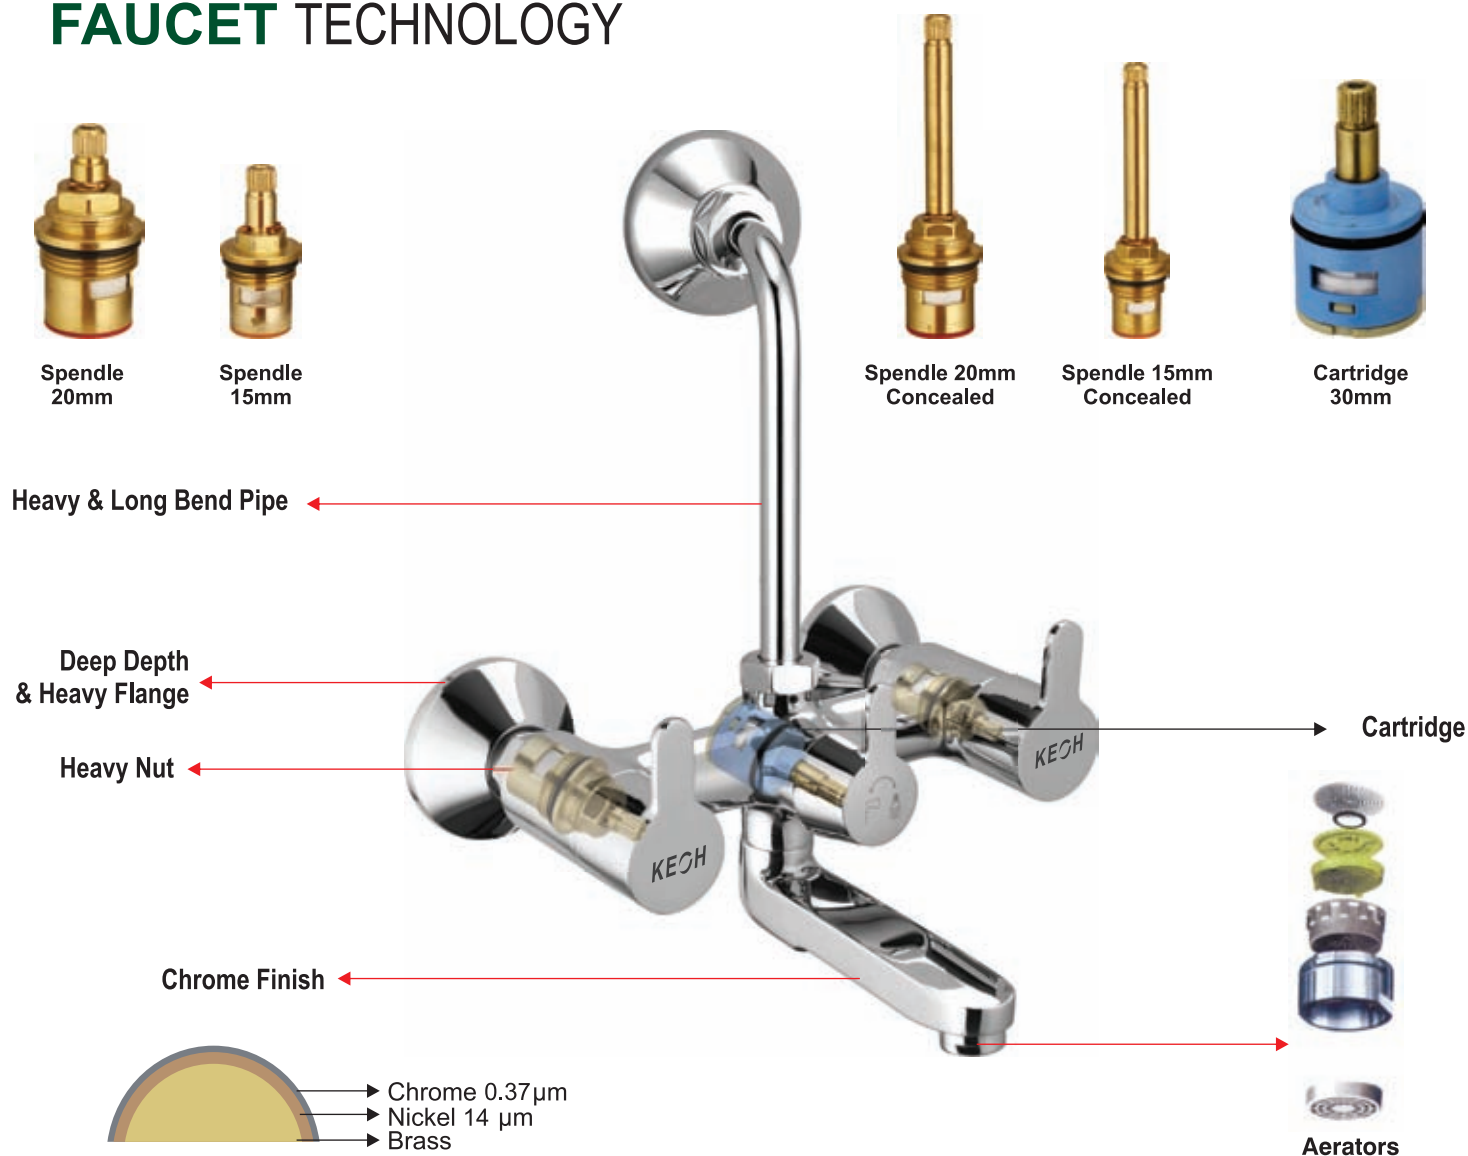

GO  GREEN !

QUARTER TURN SERIES

Our quarter-turn series faucets are equipped with Italian ceramic discs in their internal cartridges, ensuring smooth operation and steady water flow, even at standard pressure levels. Every metal part in the cartridge is carefully made from extruded brass rods, guaranteeing exceptional performance and durability.

FAUCET TECHNOLOGY

SINGLE LEVER SERIES

All of ketch's tap single-lever mixers are equipped with specially designed italian ceramic disc cartridges. A unique flow adjustable feature is incorporated, allowing for smooth operation even at low pressures. This special feature is only available in the country and is a standard addition to all ketch faucets.
